1. BRAND OVERVIEW

3. TYPOGRAPHY

Font Families

```
| Family | Usage | Fallback |
|---|---|---|
| `WiseSans Heavy` | Hero headings (H1), large display text | `Arial` |
| `Inter` | All other text – body, nav, buttons, cards, labels, subheadings | `Arial` |

/* Font stack */
--font-display: "WiseSans Heavy", Arial, sans-serif;
--font-body: inter, Arial, sans-serif;
```

Note: `WiseSans Heavy` is Wise's proprietary custom typeface. For a different brand, substitute with a heavy geometric display font (e.g. `Inter Black`, `Syne`, `Space Grotesk`, or `Clash Display`).

Type Scale

The type system uses a **Major Third scale (1.25x)** with a base of **16px**.

Level	Element	Font Size	Line Height	Font Weight	Letter Spacing	Font Family
Display / H1	Hero headings	80px	80px (1:1)	600	normal	WiseSans Heavy
H2	Section headings (approx.)	~39px	~54px	600	normal	Inter
H3 / Section	Large section headings	37px	51.8px (1.4x)	600	normal	Inter
H3 variant	Date/card headings	30px	42px (1.4x)	600	normal	Inter
Job title	Vacancy tile title	25px	32.5px (1.3x)	600	1.1px	Inter
Blog title	Post card title	24px	33.6px (1.4x)	600	1.1px	Inter
Subtitle	Nav sub-items	20px	29.4px	400	normal	Inter
Large label	Nav links, section sub	18px	26.46px	600	normal	Inter
Body / Button	Body text, CTAs, nav links	16px	23.52px (1.47x)	400 / 600	normal	Inter
Small label	Metadata, tags	14px	20.58px	600	normal	Inter
XS / Caption	Badges, sub labels	12px	17.64px	600	normal	Inter

Computed scale (base 16px, multiplier 1.25x):

12.8px → 16px → 20px → 25px → 31.25px → 39px → 48.8px → [80px display]

Typography Rules

- **Hero headlines** are ALL CAPS, `WiseSans Heavy`, line-height = font-size (tight/display ratio)
- **Section headings** use `Inter 600` with 1.4x line height

- **Letter spacing of `1.1px`** is applied to card titles and CTA links (slightly tracked-out)
- **Body text** is `Inter 400`, 16px, 1.47× line height
- **No italic** usage observed

4. SPACING SYSTEM

The spacing scale is derived from an **8px base grid** with some 4px sub-steps.

Token	Value	Usage context
---	---	---
`--space-1`	`4px`	Micro gap
`--space-2`	`7-10px`	Tight spacing, inner label padding
`--space-3`	`12px`	Button vertical padding
`--space-4`	`16px`	Base unit
`--space-5`	`20px`	Card inner padding, margin between elements
`--space-6`	`22px`	Card content padding top
`--space-7`	`28-30px`	Section element gaps
`--space-8`	`40-42px`	Button horizontal padding, section spacing
`--space-9`	`50px`	Section vertical padding (standard)
`--space-10`	`60-70px`	Container horizontal padding
`--space-11`	`80px`	Large section vertical padding
`--space-12`	`100px`	Container edge padding (footer inner)

Key spacing patterns:

- Standard button padding: `12px 42px` (vertical / horizontal)
- Card padding: `20px` all sides
- Blog card body: `22px 22px 50px`
- Section padding: `50px` standard, `80px` on large containers
- Container horizontal padding: `70px` (header, nav), `100px` (footer)
- Grid gap: `20px` (cards), `30px` (job list), `2%` (footer grid)

5. LAYOUT & GRID

Container / Max Widths

Context	Max Width	Horizontal Padding
---	---	---
Global max	`1360px`	`70px`
Header nav bar inner	`1360px`	`70px`
Hero content column	`600px`	`50px`
CTA / paragraph section	`1150px`	`70px`
Footer inner container	`1360px`	`100px`
Job card	`290px`	—

Grid Patterns

```
/* Job listings grid */
display: grid;
grid-template-columns: repeat(auto-fill, 290px);
gap: 30px;

/* Footer main grid */
display: grid;
grid-template-columns: ~67% ~25%;
gap: 2%;

/* Header bar */
display: flex;
flex-direction: row;
justify-content: space-between;
align-items: center;

/* Blog/Reviews carousel */
display: grid;
gap: 20px;

/* (uses Swiper JS for horizontal scroll) */
```

Layout Structure

- **Full bleed sections**: hero, testimonials (dark green), CTA banners
- **Contained content**: max-width `1360px`, centered, padded `70–100px`
- **Two-column hero**: left text/CTA (~50%) + right image (~50%)
- **Cards**: uniform 290px wide, 24px border-radius, stacked in grid

6.2 Buttons

Wise uses one primary button style — a **text link styled as a button** with padding and letter-spacing. No filled solid color buttons were found; the styling comes from the background of the parent section.

```
/* Primary CTA Button (on dark green background → appears lime-like contrast) */  
.attrax-button, .link-button {
```

font-family: inter, Arial;

font-size: 16px;

font-weight: 600;

color: rgb(22, 51, 0); /* #163300 dark green */

background: transparent;

padding: 12px 42px;

letter-spacing: 1.1px;

12. DESIGN PRINCIPLES (Observed)

1. ****Bold type as hero**** — Headlines are enormous (80px), uppercase, and tight. Type does the visual heavy lifting
2. ****Two-color simplicity**** — Almost the entire site uses just dark green + lime green + white + warm grey
3. ****No shadows on cards**** — Flat design; cards rely on background color contrast, not elevation
4. ****Rounded cards, square buttons**** — Cards use 24px radius; CTAs/buttons use 0 border-radius
5. ****Generous spacing**** — 50–80px section padding creates breathable layouts
6. ****Photography + type overlay**** — Right-side imagery with floating job cards creates dynamism
7. ****Full-bleed color blocking**** — Alternating white and dark-green sections create strong visual rhythm
8. ****Letter-spacing on links**** — 1.1px tracking on card titles and CTA links adds character
9. ****Consistent 290px card width**** — All cards (jobs, reviews) are the same width for visual consistency
10. ****Fixed sticky CTA**** — Persistent "Search for jobs" pill always visible in bottom right

This documentation covers everything needed to recreate the Wise design language for another brand — simply swap out the brand colors, replace `WiseSans Heavy` with your chosen display typeface, and apply your own logo/content. The structural system, spacing, component styles, and layout blueprints are all directly reusable.
